

QuickSnap Reference Guide

Thank you for downloading QuickSnap, the screenshot utility for Mac OS X.

Requirements: Mac OS X 10.4 or later, a Mac with a G3, G4, G5 or Intel processor

Taking a screenshot

To take a screenshot, first choose the screenshot mode: **Screen**, **Selection** or **Window** by single-clicking on one of the mode buttons.

Then click on the 'Capture' button, and the screenshot will be taken.

Capture shortcuts: ⌘+⇧+Z for Screen, ⌘+⇧+A for Selection, ⌘+⇧+A for Window.

Changing the screenshot preferences

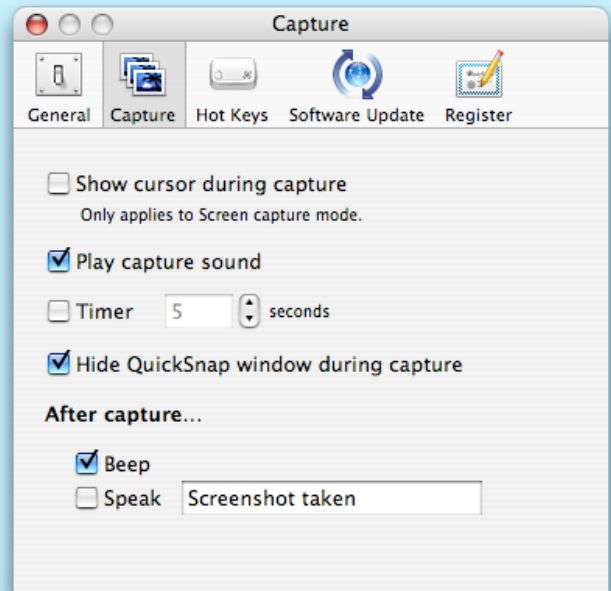

You can change several options in the **General** and **Capture** sections of the Preferences window (⌘+, or select **Preferences** from the **Apple menu**).

Hot Keys

Hot Keys enable QuickSnap to be accessed globally from any application you use on your Mac through simple keyboard shortcuts.

Register today!

QuickSnap is shareware and is available worldwide for just \$14.95 for a single-user license. Licenses can be purchased online from www.fastforwardsw.com.
